Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30, 32 and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stein in view of DE 4433474.

There is disclosed in Stein a brewing apparatus, comprising: a blend tank 22; a heat exchanger 17 connected to the blend tank; a brew tank 10 connected to the blend tank; a pump 15 in fluid communication with the blend tank and heat exchanger; and a cooling system 21 connected to the blend tank.

There is disclosed in the German reference a brewing apparatus which makes use of a lifting base 5 for supporting tea bags within a brew tank, a lifting means 6 connected to the base, and a holding mechanism 7 in connection with a lid, the holding mechanism and base providing for the squeezing of concentrate from the tea bags.

It would have been obvious to one skilled in the art to substitute the brew basket of Stein with the movable base and holding mechanism taught in DE 4433474, in order to allow for the brewing of tea as opposed to coffee with the brewing device.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art as applied to claim 30 above, and further in view of Goerndt.

Art Unit: 1761

Goerndt discloses that it is old and well known to have a source of liquid sweetener in connection with a brewing device. It would have been obvious to one skilled in the art to provide the device of Stein, as modified by DE 4433474, with the sweetener delivery means of Goerndt, in order to provide to the user a flavor enhancer for the brewed beverage.

Allowable Subject Matter

Claims 33-39 and 43-53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to McDonald and Miller are cited for their disclosure of the state of the art.
